DETAILED ACTION

Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999

(AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b).

Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Hartmann (US Pat# 6,130,936).

Regarding claim 1, Hartmann teaches a system and method for terminating a telephone call wherein a user can activate a mechanical switch after which an audio message stored can be relayed to a calling party in (see col. 2 lines 40-45, lines 63-col. 3 line 1, col. 4 line 65-col. 5 line 1, col. 6 lines 41-45 and col. 7 lines 17-23).

Regarding claim 2, Hartmann teaches a mechanical device in the form of a button or switch in (see figs. And disclosure).

Art Unit: 2643

Regarding claim 3, Hartmann teaches an audio generator for generating a sound signal to a calling party.

Claim Rejections - 35 U.S.C. § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hartmann in view of Saito (US Pat# 6,526,263).

Regarding claim 4, Hartmann fails to teach coupling a processor to an impedance matching circuit as taught by Saito who teaches a radio telephone with an impedance matching circuit in conjunction with a control circuit in (see figs.).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teaching of Saito into that of Hartmann thus making it possible to reduce noise, enhance sound intelligibility and to reduce transmission loss.

5. Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hartmann.

Regarding claims 5-6, The examiner takes official notice that it's well known in the art to have a mobile telephone with an earpiece to hear voice and audio signals from a calling party and well known is the ability to record sound for a mobile terminal, download distinctive tones or sounds into the phone using an external means.

Art Unit: 2643

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the well known usage of an earpiece and the ability to record or download music into a mobile terminal thus making it possible to provide desired features including answering greetings, voice mail messages, distinctive ringing and so forth.

Conclusion

6. Any inquiry concerning this communication or earlier communication from the examiner should be directed to REXFORD BARNIE whose telephone number is (703) 306-2744.
